

California OES Weather Threat Briefing

Friday, June 4, 2021
9:00 AM PDT

Day 1 (Friday): Hot temperatures are expected statewide again today, with the most significant impacts possible across the deserts of Southern Region. Isolated thunderstorms will again be possibly, mainly across the central Sierra this afternoon.

WEATHER KEY POINTS

06/04/21 - 06/10/21

Friday - Thursday

- Generally dry conditions are expected through the weekend and into next week, though isolated showers and thunderstorms are possible in the afternoons across the mountains of Inland Region, especially Friday
- Hot temperatures will continue over much of the state through Friday, with widespread 90s or 100+ degree readings expected across the southern deserts. Moderate to locally high heat risk is expected. A cooling trend is expected through the weekend, though areas of moderate heat risk will continue Saturday across the Central Valley and southern desert areas.
- Locally gusty winds of 25-40 mph and very dry conditions will produce elevated fire weather conditions each day, especially along mountain slopes
 - These winds will likely be strongest across northeast California and the southern California mountains and deserts
 - An approaching trough late this weekend into Monday may cause additional critical fire weather concerns for northeastern portions of California
